FOR IMMEDIATE RELEASE

**ANTOPIA® — GREEN PEST CONTROL, ENVIRONMENTALLY FRIENDLY
PEST CONTROL OR IPM, WHATEVER YOU CALL 'IT', JUST GOT EASIER!**

The **ANTOPIA® Bait Station** from **Innovative Pest Control Products** [IPCP] is a 'user friendly' device that allows Pest Management Professionals to securely place a large volume of ant bait in a spill-resistant container. **ANTOPIA®** holds 7 ounces of liquid or granular baits in a spill-resistant configuration, or up to 14 ounces of bait when spill resistance is not a primary concern. The large volume means less frequent refilling and longer periods between services.

- **ANTOPIA®** is a blow-molded station with a locking fill port.
- **ANTOPIA®** combines the bait reservoir and anchor in one piece.
- **ANTOPIA®** is constructed for multi-season use out of thick HDPE.
- **ANTOPIA®** protects the bait from the environment and the environment from the bait, which is becoming more important as concerns about pesticide contamination of ground water increase.

ANTOPIA® is designed to work best with **Gourmet Liquid Ant Bait®**. Gourmet Liquid Ant Bait® is registered in all 50 states, the District of Columbia and Puerto Rico. Gourmet Liquid Ant Bait® has been tested extensively on Argentine ants in California with significant successful results (details are available on our Web site). A special version of Gourmet Liquid Ant Bait® is available in Canada.

ANTOPIA® can be ordered from Pest Control Distributors throughout the country.

There are 4 **ANTOPIA®** bait stations and 2 quarts of Gourmet Liquid Ant Bait® in each **ANTOPIA®** box.

For additional information on Innovative Pest Control Products, Gourmet Ant Bait Gel®, Gourmet Liquid Ant Bait®, Gourmet Liquid Ant & Roach Café Ready-to-Use Bait Stations, Ant Café® Bait stations and the **ANTOPIA®** Bait Station, please visit us on the Web at www.antcafe.com.
