

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water when disposing of equipment wash waters or rinsate.

The use of any pesticide in a manner that may kill or otherwise harm an endangered species or adversely modify their habitat is a violation of federal law.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal of this product.

Storage: Store product in original container in a cool dry place out of reach of children. Do not allow product to freeze.

Disposal: If empty: Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place used product down any indoor or outdoor drain.

¹Honeydew refers to the excretions of plant sucking insects that may be used as food by ants

Gourmet Liquid Ant Bait

Honeydew¹ Formula

No Mess • Use Outdoors

Kills Sweet & Protein Feeding Ants, except Fire & Harvester Ants

Use to Control Argentine Ants In;

Avocado, Berries, Cherimoya and other Subtropical fruits, Citrus, Cranberry, Grapes, Pome Fruit, Stone Fruit, Strawberry and Tree Nuts

Active Ingredient:

Disodium octaborate tetrahydrate ..1.0%
Other Ingredients99.0%
Total100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION

Net Contents: 2.5 gallons (Ag Uses)

Manufactured By:
Innovative Pest Control Products
8885 SW 7th Street Boca Raton, FL 33433
USA

EPA Reg. No. 73766-2
EPA Est. No 81994-GA

DIRECTIONS FOR USE- AGRICULTURAL USES

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear: • Long sleeved shirt and long pants • Chemical resistant or waterproof gloves •Shoes plus socks

User Safety Recommendations

Users should: • Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. • Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. • Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible wash thoroughly and change into clean clothing.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statement on this label about personal protective equipment (PPE), notification to workers, and restricted-entry interval. The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

To kill sweet and protein feeding ants use Gourmet Liquid Ant Bait in conjunction with bait stations that are designed for ant control and meet EPA-ChemSAC criteria such as KM AntPro Baiting System and Ant Cafe Bait Stations. Follow filling instructions accompanying individual bait stations. It is recommended that Gourmet Liquid Ant Bait initially be used at full strength. If it appears that the ants are not readily accepting the bait, the bait may be made more attractive by dilution with water or other food grade liquid 1:1 to make bait containing 0.5% active ingredient. It does not affect distribution of stations or gallons per acre.

INSTRUCTIONS FOR PLACEMENT OF AND FILLING OF BAIT STATIONS OR OTHER DELIVERY SYSTEMS.

For best results place stations in shaded areas or create shade for the bait station. Avoid placing bait station where it will receive direct sunlight whenever possible.

Place a sufficient number of bait stations per acre so that a continuous supply of bait can be maintained during the treatment period. For initial placement, use approximately 1 gallon/A (full strength or 1:1 ratio) for light populations, 2 gallons/A (full strength or 1:1 ratio) or medium populations and 3-4 gallons/A (full strength or 1:1 ratio) for heavy populations. The distribution and number of bait stations will vary based on the volume of bait in each station, crop, the time of year, and species of ant and service frequency. The amount of bait per station and the number of bait stations can be reduced as the ant population is reduced. Each situation must be evaluated individually and the expertise of the applicator will have to guide bait station placement.

Place bait stations containing this product in areas where ant foraging is observed. Ants tend to follow natural lines in the environment, so use tree trunks, vines, watering lines, soil trunk interfaces and manmade rows as possible points at which to position bait stations. Between seasons, ant populations may migrate to areas where water is available. Try to place stations between these ant reservoirs and acreage being cultivated.

Ants are attracted to and will feed on Gourmet Liquid Ant Bait until they die. The bait is designed to work slowly and sufficient bait should be made available for at least 14 days of continuous feeding or until foraging terminates. Replace the bait with fresh bait as needed. When using bait stations, wash hands thoroughly before handling to remove any odors that may be repellent to ants, i.e. tobacco, garlic, strong chemicals/ cleaners, etc.
